

Annur Hangga Prihadi

Product Lead | Fintech Platform Lead | Data & Strategy

Indonesia | annurhanggaprihadi@gmail.com | +62-821-1444-1954 | [linkedin.com/in/ahprihadi](https://www.linkedin.com/in/ahprihadi)

PROFESSIONAL SUMMARY

Lead Product Manager & Technical Strategist with a strong background in building data-driven platforms from 0-to-1. Expert in translating complex business requirements into scalable technical roadmaps (APIs/Microservices). Proven track record in leading cross-functional squads to deliver high-volume transaction engines. Experienced in driving end-to-end product delivery from detailed technical specifications to successful UAT, aligning perfectly with scalable enterprise SaaS and ERP solutions.

CORE COMPETENCIES & TECHNICAL SKILLS

Product Management: Product Lifecycle Management (PLM), Roadmap Strategy, Agile & Scrum, User Stories, Market Research, Competitive Analysis, Requirements Gathering, User Acceptance Testing (UAT), ERP Concepts, Go-to-Market Strategy.

Data & Analytics: SQL, Python, Google Analytics, Product Analysis, A/B Testing, Financial Modeling.

Technical Stack: System Architecture, API Integrations, Microservices, Cloud Infrastructure (GCP), Smart Contracts.

Tools: JIRA, Confluence, Linear, Figma, Notion, Slack.

PROFESSIONAL EXPERIENCE

NoaSight Jakarta

Product Lead Jul 2023 – Present

Present Led the end-to-end product strategy and development of a high-frequency trading platform from 0-to-1, managing the lifecycle from initial R&D to market launch.

- **Product Strategy & Launch:** Defined the product roadmap and executed a GTM strategy that acquired **300+ active users** and achieved **\$42K+ in monthly Gross Transaction Volume** within 6 months of beta launch.
- **Technical Leadership:** Architected the platform's core matching engine and settlement layer, translating complex market requirements into technical specifications for the engineering team.
- **Agile Management:** Managed a cross-functional team of 4 (Engineers, Design, Ops) using **JIRA** to deliver weekly sprint releases, facilitating UAT sessions and bug tracking to ensure alignment between business goals and technical execution.
- **Data-Driven Growth:** leveraged **SQL** to analyze user transaction behaviors, implementing retention features that increased Daily Active Users (DAU) and platform liquidity.
- **R&D & Feasibility:** Conducted feasibility studies on distributed ledger technologies and financial models, selecting the optimal tech stack for high scalability and security.

Cloudsolutely Pte. Ltd. Singapore

Product & Data Analyst Nov 2022 – Jun 2023

Executed high-impact investment strategies and technology implementation for cryptocurrency portfolio, focusing on emerging blockchain sectors.

- Conducted **market research** and **data analysis** on emerging fintech sectors to guide a **\$1M+ corporate asset portfolio** strategy.
- Leveraged **SQL** and **Python** to analyze market trends, optimizing asset allocation strategies that resulted in **68% YoY portfolio growth**.
- Led the implementation of **institutional-grade security protocols** (MPC technology) for asset custody, reducing operational risk by 80%.
- **Delivered research** and strategic insights to C-level leadership on blockchain trends and portfolio allocation.

Trisakti University Jakarta

Assistant Lecturer Aug 2020 – Aug 2022

Designed and delivered advanced curriculum across 5 core computer science courses, pioneering blockchain education integration.

- Designed and delivered technical training materials and curriculum for 5 core computer science courses (Data Science, Enterprise Architecture) to 120+ students, effectively managing user education and achieving a 90% satisfaction rate.
- Facilitated hands-on workshops for Ethereum development and Smart Contracts (Solidity), mentoring 40+ students on real-world blockchain applications.

Bangkit Academy led by Google

Jakarta

Cloud Engineer & Project Lead

Feb 2021 – Jul 2021

Selected for prestigious Google-backed program. Led cross-functional capstone project developing ML solution for agricultural price prediction.

- Led the development of an AI-driven agricultural price prediction model using Machine Learning, directly addressing supply chain volatility.
- Achieved 84% accuracy (ARIMA, Holt-Winters) and deployed scalable cloud infrastructure.
- Secured project extension and additional funding after presenting impact and ROI.

ASEAN Foundation

Jakarta

Data Analyst & Team Leader

Feb 2020 – Aug 2021

Led team conducting comprehensive data analysis on UN SDG 12 (Responsible Consumption and Production) addressing agricultural sustainability.

- Analyzed 2,000+ agricultural data points to evaluate sustainability gaps in Indonesia and Vietnam.
- Developed recommendations projected to increase farmer income stability by ~10%.
- Presented findings to ASEAN Foundation through executive reporting.

EDUCATION

Trisakti University

Jakarta

BCS., *Cum laude*, Computer Science, GPA 3.74/4.00

Aug 2018 – Aug 2022

Thesis: "Modern Business Models Using Ethereum Blockchain Platform and Google Cloud Platform" -

Grade: A (4.0)

RESEARCH PUBLICATIONS

- **"The Future of Business Models: How Ethereum Blockchain with Smart Contract Wallets and Decentralized Storage are Revolutionizing the Business Landscape"** (2023) - Explores smart contract wallets and Arweave decentralized storage for supply chain transparency
- **"A Modern Business Model Using the Ethereum Blockchain Platform and Google Cloud Platform"** (2022) - Presents innovative framework utilizing Ethereum and GCP for end-to-end supply chain transparency
